The interviews contain spirited views on how and why humans have branded the world around us, and the ideas, inventions, and insight inherent in the search.

"The world needs organisations to do good whilst making profit. Powered by Purpose is a practical guide for leading an organisation that fulfils both of these needs." Bill Winters, CEO, Standard Chartered Bank "Compulsory reading for any leader searching for purpose and looking to authentically transform their organisation, people and planet for positive impact." Esther Foreman, CEO, The Social Change Agency Companies with an authentic purpose outperform the market by 42%, according to recent research. The lauded leadership styles that were finely adapted to our past reality will not carry us forward. Powered by Purpose outlines the four core leadership capacities that you need to help you feel alive at work, lead an enthusiastic team and generate competitive advantage: 1. Cultivate Leadership Presence - how you can act in a way that others are inspired to follow 2. Make Dialogue Authentic - how to talk about what matters most including people's long term wellbeing 3. Engage your Stakeholders - how to articulate your purpose in a way that engages and energises people 4. Brands on a Mission explores the importance of creating a performance culture that is built on driving impact through purpose, and the type of talent required to drive these transformational changes within companies – from CEO to brand developers. Using evidence from interviews and stories from over 100 CEOs, thought leaders and brand managers, the book presents an emergent model that organisations can follow to build purpose into their growth strategy – and shows how to bridge the gap between Brand Say and Brand Do. Readers will learn from the real experts in the field: how Paul Polman, former CEO of Unilever, built purpose into the DNA of his company; what keeps Alan Jope (new CEO, Unilever) and Emmanuel Faber (CEO, Danone) awake at night; and how brand developers from Durex, Dove, Discovery and LIXIL have made choices and the reasons behind them. In this book you will learn how a soap brand Lifebuoy taught one billion people about hygiene, how a beer is tackling gender-based violence, and how a toothpaste is tackling school absenteeism amongst many others. Renowned experts like Peter Piot (Director, London School of Health and Tropical Medicine), Michael Porter (Professor, Harvard School of Business), Jane Nelson (Director, Corporate Responsibility Initiative, Harvard Kennedy School) and Susie Orbach (leading feminist and formerly professor, London School of Economics) also share examples, data and their everyday experiences of helping corporates create a culture of purpose. And leading NGOs and UN experts like Lawrence Haddad (Executive Director, GAIN) and Natalia Kanem (Executive Director of UNFPA) will recount how the public and private sector have worked together to create an accelerated path to reaching the Sustainable Development Goals by 2030. The book provides a clear pathway of how to take brands through the journey of developing impactful social missions and driving business growth, and is an essential guide for both managers and students alike.

Until this book was written, the phrase "brands are stories" was merely a marketing cliché. Having delved into how stories influence our behavior, however, the author asserts that the association between stories and brands deserves far more than that stock phrase. Among the many books about branding directed toward marketing and advertising practitioners and students, none is like StoryBranding. Modeled after the way stories work, this book provides a unique planning process for creating authentic brand identities. It also reveals a number of concealed traps that other branding approaches often overlook. Drawing on the persuasive power of stories, the author argues that a great deal of wasted effort is put into creating advertising messages that do too much "telling" and too little "showing." To help brands resonate with their audiences, the author takes you step-by-step through StoryBranding's six C's—a process that shows how to approach the development of all brand communications the way story writers approach their characters, plots, and themes. He includes sample "Story Briefs" and "I AM" statements that help brands achieve a greater degree of authenticity than traditional creative or brand briefs have.

This book is an original, high-quality collection of chapters about highly topical and important brand management issues, and it shows both theoretical and empiric analysis. As well to the practitioners who can find a wide reference also to the managerial implication from the strategic and operative perspectives.

Discover proven strategies for building powerful, world-class brands It's tempting to believe that brands like Apple, Nike, and Zappos achieved their iconic statuses because of serendipity, an unattainable magic formula, or even the genius of a single visionary leader. However, these companies all adopted specific approaches and principles that transformed their ordinary brands into industry leaders. In other words, great brands can be built—and Denise Lee Yohn knows exactly how to do it. Delivering a fresh perspective, Yohn's What Great Brands Do teaches an innovative brand-as-business strategy that enhances brand identity while boosting profit margins, improving company culture, and creating stronger stakeholder relationships. Drawing from twenty-five years of consulting work with such top brands as Frito-Lay, Sony, Nautica, and Burger King, Yohn explains key principles of her brand-as-business strategy. Reveals the seven key principles that the world's best brands consistently implement Presents case studies that explore the brand building successes and failures of companies of all sizes including IBM, Lululemon, Chipotle Mexican Grill, and other remarkable brands Provides tools and strategies that organizations can start using right away Filled with targeted guidance for CEOs, COOs,

entrepreneurs, and other organization leaders, *What Great Brands Do* is an essential blueprint for launching any brand to meteoric heights.

Brand the Change is a guidebook to build your own brand. It contains 23 tools and exercises, 14 case studies from change making organisations across the world and 7 guest essays from experts.

A single tweet from an irate customer can topple a CEO, much like a new business formed by a 20-something can disrupt business empires. Market economists have told us that we're driven only by money and status, but the inherent human truth that cuts across age, culture and gender uncovers a stronger force: we wish to be in charge of our own lives and our own happiness. Through extensive growth and affinity research, Thomas Kolster uncovers a simple answer that is key to driving marketing growth in the 21st century: if you put people in control of the marketing mix, from products to promotion, they can grow and in turn grow your organisation. This book explains the meteoric rise of a company like AirBnB, how a 20-something Swede, Maria de la Croix, built a global coffee empire like Wheelys in just a few years, and how a group of friends hanging out in a bar in Melbourne created one of the largest global non-profits fighting for men's health, Movember – and how you can empower people to do the same. Kolster calls this feature 'Empowerability': the ability of an organisation to empower its customers (or stakeholders) to leverage their means and capabilities as a resource in the marketing mix, from product to promotion. Empowerability bridges the gap between aspiration and action and unlocks the door to Marketing's Holy Grail: moving people from awareness to purchase. Today's power no longer rests in the hands of the privileged few, but in the talented many. It is time for you to unleash that power, in numbers.

This book is not available as a print inspection copy. To download an e-version click [here](#) or for more information contact your local sales representative. Presenting the basics of brand management, the book provides both a theoretical and practical guide to brands, placing emphasis on the theory that the consumer is a co-creator in a brand's identity. In a world in which social media and inclusive digital platforms have increased customer engagement, the role of brands and branding has changed. The line between the producer and the consumer has become blurred; consumers are no longer the recipients of brand identity, but the co-creators, playing a significant role in shaping new products and systems. To help students better understand the basics of brand management, and the co-creation theory, the book includes a collection of geographically diverse case studies, including: Burger King, Lego, Lynx, Maserati, HSBC and Vegemite. The book is complemented by online resources for lecturers and students, including PowerPoint slides, journal articles, web and video links, and a selection of exclusive videos with a professional brand consultant. Suitable reading for students of branding and brand management modules.

He then applies these insights to practical steps that you can take right now to reach people through what matters most to them, including: Stop talking about yourself—let the movement control your message Home in on the core objectives of your concept or brand—and align these values with what people are for (or against) "Light the spark"—create a culture within your organization that can embrace and drive a movement Leverage your assets—content, events, expertise, connecting platforms—to give people tools to spread your gospel Adjust concepts to travel across borders and link people across cultural boundaries The examples and guidance in this book will prepare you to find, connect to, and even lead the next big movement. The most important assets of any business are intangible: its company name, brands, symbols, and slogans, and their underlying associations, perceived quality, name awareness, customer base, and proprietary resources such as patents, trademarks, and channel relationships. These assets, which comprise brand equity, are a primary source of competitive advantage and future earnings, contends David Aaker, a national authority on branding. Yet, research shows that managers cannot identify with confidence their brand associations, levels of consumer awareness, or degree of customer loyalty. Moreover in the last decade, managers desperate for short-term financial results have often

unwittingly damaged their brands through price promotions and unwise brand extensions, causing irreversible deterioration of the value of the brand name. Although several companies, such as Canada Dry and Colgate-Palmolive, have recently created an equity management position to be guardian of the value of brand names, far too few managers, Aaker concludes, really understand the concept of brand equity and how it must be implemented. In a fascinating and insightful examination of the phenomenon of brand equity, Aaker provides a clear and well-defined structure of the relationship between a brand and its symbol and slogan, as well as each of the five underlying assets, which will clarify for managers exactly how brand equity does contribute value. The author opens each chapter with a historical analysis of either the success or failure of a particular company's attempt at building brand equity: the fascinating Ivory soap story; the transformation of Datsun to Nissan; the decline of Schlitz beer; the making of the Ford Taurus; and others. Finally, citing examples from many other companies, Aaker shows how to avoid the temptation to place short-term performance before the health of the brand and, instead, to manage brands strategically by creating, developing, and exploiting each of the five assets in turn

The future of work is already here, and what this future looks like must be a pressing concern for the current generation of leaders in both the private and public sectors. In the next ten to fifteen years, rapid change in a post-pandemic world and emerging technology will revolutionize nearly every job, eliminate some, and create new forms of work that we have yet to imagine. How can we survive and thrive in the face of such drastic change? Deanna Mulligan offers a practical, broad-minded look at the effects of workplace evolution and automation and why the private sector needs to lead the charge in shaping a values-based response. With a focus on the power of education, Mulligan proposes that the solutions to workforce upheaval lie in reskilling and retraining for individuals and companies adapting to rapid change. By creating lifelong learning opportunities that break down boundaries between the classroom and the workplace, businesses can foster personal and career well-being and growth for their employees. Drawing on her own experiences, historical examples, and reports from the frontiers where these issues are unfolding, Mulligan details how business leaders can prepare for and respond to technological disruption. Providing a framework for concrete and meaningful action, Hire Purpose is an essential read about the transformations that will shape the next decade and beyond.

Runaway climate change and rampant inequality are ravaging the world and costing a fortune. Who will help lead us to a better future? Business. These massive dual challenges—and other profound shifts, such as pandemics, resource pressures, and shrinking biodiversity—threaten our very existence. Other megatrends, such as the push for a clean economy and the unprecedented focus on diversity and inclusion, offer exciting new opportunities to heal the world, and prosper by doing so. Government cannot do this alone. Business must step up. In this seminal book, former Unilever CEO Paul Polman and sustainable business guru Andrew Winston explode fifty years of corporate dogma. They reveal, for the first time, key lessons from Unilever and other pioneering companies around the world about how you can profit by fixing the world's problems instead of creating them. To thrive today and tomorrow, they argue, companies must become "net positive"—giving more to the world than they take. A net positive company: Improves the lives of everyone it touches, from customers and suppliers to employees and communities, greatly increasing long-term shareholder returns in the process. Takes ownership of all the social and environmental impacts its business model creates. This in turn provides opportunities for innovation, savings, and building a more humane, connected, and purpose-driven culture. Partners with competitors, civil society, and governments to drive transformative change that no single group or enterprise could deliver alone. This is no utopian fantasy. Courageous leaders are already making it real—and the stakes couldn't be higher. With bold vision and compelling stories, Net Positive sets out the principles and practices that will deliver the scale of change and transformation the world so desperately needs.
